

AMENDMENTS TO THE SPECIFICATION

Please replace Paragraph [0020] with the following paragraph rewritten in amendment format:

[0020] A controller 48 is provided for controlling operation of motor 44 and blower 38 as well as sensing the voltage level of the cells of fuel cell stack 22. Controller 48 is provided power from low voltage power source 46 and later from fuel cell stack 22 when operational. Controller 48 in conjunction with low voltage power source 46 can also be used to control operation of hydrogen supply valve 28 when it is being electrically controlled. It should be understood that the terms “low voltage” and “high voltage” as used herein are relative terms and that “low voltage” refers to a voltage of less than or equal to about 50 volts while “high voltage” refers to a voltage in excess of about 50 volts.
